2020 CRISTANINI CBRN COMPANY PROFILE

Since 1972, **CRISTANINI** has been creating and manufacturing innovative and technically advanced solutions that, today, are worldwide appreciated.

CRISTANINI product range, both for civil and military sectors, became a Made in Italy flagship brand, reaching an unprecedented “Know How” at the highest level, in these specific areas.

Over the years, **CRISTANINI** reputation grew also thanks to the support of its Certificates of Excellence, issued by Independent Research laboratories, International Organizations, Universities, etc. An avant-garde research and more than 30 patents are the result of a creative work to offer solutions to problems more and more connected to safety and to the environment, using sophisticated technologies “made by us”.

CRISTANINI CBRN decontamination systems are the synthesis of ruggedness, resistance and simplicity. They were developed to decontaminate/detoxicate the most various and different surfaces (buildings, vehicles, terrains, etc.) with only one product, called BX 24. BX 24, one of our exclusive jewels is very performant and effective against CWA, BWA, TICs and other serious, alarming emergencies. The decontaminant and detoxicant product range manufactured and offered today by **CRISTANINI** has been expanded with the introduction of SX 34 for the decontamination of sensitive elements (avionics, electric systems and electronic components, optics, TV closed circuit systems) as well as aircraft cockpits. Our latest development is called LDV-X; a system to decontaminate and detoxicate indoor spaces of airplanes, trains, metros and large closed infrastructures.

Since 1987, **CRISTANINI** is officially NATO constructor n. A5009. The company has the ISO 9001:2015 quality system and, above all, it has the important AQAP 2110 certification for the design and manufacturing of its military products for the CBRN sector.

The distinction to be present in over 70 Countries represents an exceptional support to reach our ambitious and eminent goal: to continue supplying global safety and assistance to people and to the environment in case of industrial disasters, chemical, biological,

CRISTANINI

radiological or nuclear attacks or terroristic acts, in the highest respect, we repeat of our surrounding environment.

CRISTANINI is actively present in the most relevant CBRN and safety worldwide events: conferences, symposiums, exhibitions, discussion panels and presentations. All this allow us to offer our most advanced solutions and, at the same time to listen, getting to know about new needs, new problems that arise which give us a major enthusiasm to reach new objectives and to propose our customized solutions with highly technological systems, which will always be the main characteristic of our company.

ONE MACHINE, ONE PRODUCT, ONE OPERATOR
THE MOST EFFECTIVE AND SIMPLE SOLUTION, USED FOR
CBRN DECONTAMINATION AND DETOXICATION
