Media Factsheet

About NIMR

NIMR Automotive is the leading manufacturer of light and medium weight wheeled military vehicles in the Middle East and North Africa region, based in Abu Dhabi, the United Arab Emirates. It delivers highly capable armoured and non-armoured platforms that are tailored for harsh environments, across a diverse scope of mission requirements. The vehicles are designed, manufactured and assembled in the UAE.

NIMR's world-class engineers and state-of-the-art manufacturing facility enable the company to deliver best-in-class mobility, protection and reliability across three classes of vehicle: the AJBAN, HAFEET and JAIS.

In 2012, NIMR entered into a joint venture with the Algerian Ministry of Defence to produce the NIMR vehicle range in Algeria. The partnership is testament to NIMR's success in local industry development, and NIMR's ability to transfer technologies for assembly and manufacture.

NIMR is a subsidiary of the Emirates Defence Industries Company (EDIC), an integrated defense manufacturing and services platform with Mubadala Development Company and Tawazun Holding as its principal shareholders. This partnership ensures strategic alignment with the Government's vision to grow a globally competitive defence industry within the UAE.

Key Facts

- NIMR is the leading manufacturer of light and medium-weight wheeled military vehicles in the Middle East and North Africa region.
- NIMR is majority-owned by Emirates Defence Industries Company (EDIC).
- Production of NIMR vehicles began in 2012, and the company recently celebrated the production of its 1000th vehicle.
- NIMR's range of desert-proven 4x4 and 6x6 vehicle are available in armoured or non-armoured configurations.
- NIMR employs more than 850 people.
- NIMR produces up to four vehicles per day.
- NIMR has manufacturing sites in Al Ain and Al Ajban, both located in the Emirate of Abu Dhabi.
- The new production facility has a footprint measuring 37,500 square metres, the largest of its kind in the Middle East and North Africa region.

Vehicles

NIMR has three classes of vehicles

AJBAN Class

The AJBAN class of 4x4 vehicles provides a multipurpose platform for all military requirements at 9,000kg capacity. This allows for a fleet of vehicles to meet a variety of roles whilst ensuring commonality of logistics for lower lifecycle costs.

HAFEET Class

There are three types of Hafeet 6x6 vehicles. The Hafeet 620 consists of a two-man cabin and large cargo bed, while the Hafeet 640A has a four-man cabin armoured against IED, blast and ballistic threats. The Hafeet Protected Patrol Vehicle accommodates a -10man crew and can be configured for various operational roles.

JAIS Class

The JAIS Class of 4x4 and 6x6 vehicles represent the latest generation in blast and ballistically protected vehicles specifically designed for the modern battlefield. These vehicles can be customized for several mission choices, making them the ideal choice for deployment in both conventional and asymmetric warfare.

Services

NIMR has four types of services

In-house Capabilities

NIMR has full production capability, covering fabrication, assembly and quality management expertise. Together with in-house design, engineering, prototyping and design verification capabilities, this allows NIMR to serve its growing customer base whilst ensuring that continual research and development is undertaken to meet changing requirements.

Key Services

NIMR offers a number of key services and solutions such as technology transfer for local assembly of kits, customized solutions and accelerated vehicle development cycle.

Global Supply Chain

NIMR manages a global supply chain, including strategic relationships with world class defence equipment suppliers.

Full Lifecycle Management

NIMR provides full lifecycle management of the vehicles from conception to delivery and supports production and through-life support. This includes Integrated Logistic Support (ILS), maintenance, repair, technical support and spares capability in order to manage the entire fleet and variants deployed.
