

Drinking Water National Insurance

Drinking Water National Insurance stands at the forefront of North Water Greenland's commitment to transforming water security into a dynamic and innovative solution. Going beyond traditional services, our initiative secures communities in a world continuously changing due to climate change. Our efforts are undertaken to support the UN Sustainable development goal 6 of Clean Drinking water, and our measures is one of the important efforts of medium-term climate adaption.

In a world grappling with water scarcity challenges, Drinking Water National Insurance offers a spectrum of engagement options designed to meet the diverse needs of our nations and states. Whether opting for direct water purchases, the convenience of charter vessel deliveries, or the added security of our emergency insurance subscription, our services are tailored for flexibility and ease.

Our emphasis on quality and reliability extends to every phase of the process, guaranteeing the safety and purity of water from pristine sources to delivery points. This product will be facilitated through international insurance partnerships, for long term reliability and accountability.
