

# Emergency Water

## NORTH WATER GREENLAND

North Water Greenland, takes responsibility to solve the critical task of providing drinking water at volume, when crisis strikes. Since 2019 we have been committed to global water sustainability, and our company introduces a comprehensive approach to address critical water needs during emergencies. Response time, quality and volume are critical in the time of emergency.

*Hurricane floods local water reservoir, making conventional raw water extraction impossible*

At the core of this strategy are our tanker vessels, each capable of swiftly delivering up to 150,000 m<sup>3</sup> of pristine Arctic water. This capacity ensures a rapid response to communities facing acute water shortages, servicing communities up to 10 million people with daily emergency water. Collaborating with local authorities, defense organizations, and humanitarian agencies, North Water Greenland fortifies preparedness and resilience, extending our impact beyond immediate relief.

The Emergency Water Strategy signifies our dedication to environmental responsibility and shaping a sustainable future. As we invite strategic partnerships, this initiative positions us as a beacon of hope, delivering clean water swiftly to communities worldwide. North Water Greenland remains committed to turning the tide against water scarcity, ensuring that clean, safe water is a fundamental right accessible to all, even in the most challenging circumstances.
